PROFESSIONAL SUMMARY

Security Operations Engineer with 2.5+ years of hands-on experience managing enterprise firewall, SIEM, DNS, proxy, and VPN platforms for New York City government infrastructure. Proven ability to engineer automation that eliminates manual toil and to own incident response end-to-end. CompTIA Security Analytics Professional (Security+ and CySA+) and AWS Certified Solutions Architect.

SKILLS

Security Operations: Incident Response, SIEM Administration, Log Analysis, Threat Detection, Root Cause Analysis (RCA), Vulnerability Management, Firewall Policy Management

Security Platforms: IBM QRadar (SIEM), Splunk, Palo Alto Firewalls (PAN-OS, Panorama), Checkpoint Firewalls, CrowdStrike Falcon, Burp Suite, Wireshark, Infoblox, Ivanti Connect Secure, Bluecoat Proxy, NXLog

Automation & Scripting: PowerShell, Ansible (YAML), REST API Integration

Cloud & Identity: AWS (EC2, VPC, S3, CloudFront, ELB), Azure Front Door, Microsoft Entra ID, Virtualization

Networking & Concepts: TCP/IP, DNS, TLS, SAML, SSL VPN, Site-to-Site VPN, Proxy, Firewalls

Operating Systems: Windows, Linux, macOS

CERTIFICATIONS

- CompTIA Security Analytics Professional (CSAP): Security+, CySA+
- AWS Certified Solutions Architect – Associate | AWS Certified Cloud Practitioner
- Palo Alto Networks Professional Training: Firewall Essentials (EDU-210), Firewall Troubleshooting (EDU-330), Panorama: NGFW Management

EXPERIENCE

Security Operations Engineer Fellow

Jan 2024 – Present

NYC Office of Technology and Innovation (OTI)

Brooklyn, NY

- Design, implement, and optimize firewall rules across Palo Alto (Panorama) and Checkpoint platforms for multiple NYC government agencies, strengthening security posture while minimizing service disruption.
- Developed PowerShell and Ansible (YAML) automation to pull platform health checks via REST API from Palo Alto Panorama and Ivanti Connect Secure, saving 40+ minutes per daily cycle (170+ hours annually).
- Investigate and resolve outages and security incidents; author RCA reports and deploy corrective actions to prevent recurrence.
- Analyze and validate log flow from network, firewall, and security platforms into IBM QRadar, troubleshooting ingestion and parsing issues to maintain complete SIEM visibility.
- Configure and maintain DNS records (A, CNAME, MX, TXT, SRV) in Infoblox for accurate domain resolution citywide.

IT Support Specialist Intern

Sept 2022 – Dec 2023

NYC Department of Education (DIET)

Brooklyn, NY

- Executed benchmark testing across device fleets for performance analysis and reported defects to the engineering team.

PROJECTS

OSINTVault

Personal OSINT Workspace

- Built a lightweight, browser-based OSINT workspace in HTML, CSS, and vanilla JavaScript that runs fully offline with no backend, centralizing OSINT tools, reference intel, and investigation notes so case data never leaves the analyst's machine.

PROTECT

Cybercrime Reporting Platform

- Led development of a user-friendly cybercrime reporting website focused on accessible reporting and online safety; awarded 1st place, Cybersecurity Hackathon, John Jay College (April 2023).
- Awarded 3rd place, AWS Hackathon, Queensborough Community College (October 2022), solving Load Balancing, Security, and Serverless challenges against 30 competitors.

EDUCATION

John Jay College of Criminal Justice

Manhattan, NY

B.S., Computer Science & Information Security.

Dec 2023

Relevant Coursework: Operating Systems, Network Security & Forensics, Cybercrime, Cryptography & Cryptanalysis, Computer Networking

Queensborough Community College

Bayside, NY

A.S., Computer Science & Information Security.

June 2021
